

CREATE SERVICE INSTANCE

STEP-1: Log in to your IBM Cloud account, and click on
Catalog

STEP-2: Type Cloudant in the Search bar and click to open it.

STEP-3: Select an offering and an environment

STEP-4: Select region as Dallas & Type an instance name then
click on create service.

STEP-5: After you click create the system displays a message to say that the instance is being provisioned, which returns you to the Resource list. From the Resource list, you see that the status for your instance is, Provision in progress.

- When the status changes to Active, click the instance.
